THE STORY

"We wanted to work for a better world of wine with conscious approach" —Mickaël & Camille

After agriculture engineering studies and a few years in the wine world, we decided to create EthicDrinks with the idea of doing our best for the planet and developing wines with sustainable practices and certifications. Mickaël's grandparents are winegrowers in Burgundy. His father was an environmental activist from the start.

They passed on to him their passion, their commitment and taught him that respect for nature must be at the center of our decisions. With the team, we set ourselves a guideline to reduce the ecological footprint. Our greatest wish is to combine our love of wine with the aspiration to protect our planet.

Our wines comes from sustainable and certified practices.
